

ADICHUNCHANAGIRI INSTITUTE OF TECHNOLOGY CHIKKAMAGALURU

Department of Civil Engineering

Summary Report

The course "APPLICATION OF CIVIL ENGINEERING SOFTWARE'S" was conducted at Civil Dept for the first year students from 24/08/2019 to 25/08/2019, 31/08/2019 and 01/09/2019.

During the course, the students are learn different steps involved in the various softwares like Auto CAD Software, Sketch, Priavera, QGIS, Staad Pro, E Tabs and Microsoft Office.

Course Outcomes

The students have witnessed the various uses of civil engineering software's. In addition to this, they have also understood the vast software's tools that are available in the market for a specific kind of problems connected to the civil engineering domain.

COURSE TITLE: APPLICATION OF CIVIL ENGINEERING SOFTWARE'S
Course Duration: 30 Hours

CURRICULUM

1. Civil Engineering Software for Drafting or Drawing- **Auto CAD Software**
2. 3D modelling computer program for various drawing applications such as architectural, interior design, landscape architecture – **SketchUp Software**
3. Project Management Software – **Primavera Software**
4. Modelling slope stability, ground deformation, and heat and mass transfer in soil and rock - **GeoStudio Software**
5. Geographic information system - **QGIS Software**
6. Civil structural analysis and design software – **Staad Pro. and ETABS Software**
7. Designing concrete floor and foundation systems - **SAFE and STAAD foundation Software**
8. General report writing, statistical analysis and power point presentation preparations – **Microsoft Office**

COURSE OUTCOME

The students have witnessed the various uses of civil engineering softwares. In addition to this, they have also understood the vast software tools that are available in the market for a specific kind of problems connected to the Civil Engineering domain.

Course Title	SketchUp
Faculty	Mr. Kiran Patil
Duration	30 hrs
Certificate	Course Completion Certificate.
Prerequisites	Experienced with the Windows operating system and basics of AutoCAD

Description: SketchUp is a 3D modeling computer program for a broad range of drawing and design applications — including architectural, interior design, industrial and product design, landscape architecture, civil and mechanical engineering

The SketchUp Training class provides an overview of all of the essential SketchUp skills needed for general modeling, layout, and architecture. SketchUp is one of the easiest 3D tools to use but it has many features.

We completed this course in a 4-day format and provided time to review all of the major features and given participants time to practice.

Title	BIM for Construction
Duration	30 hrs
Certificate	Course Completion Certificate from Autodesk.
Prerequisites	Working knowledge on Architectural design, drafting, or engineering experience is highly recommended

Description: Autodesk Revit is building information modeling software for architects, structural engineers, MEP engineers, designers and contractors. It allows users to design a building and structure and its components in 3D, annotate the model with 2D drafting elements, and access building information from the building model's database. Revit is 4D BIM capable with tools to plan and track various stages in the building's lifecycle, from concept to construction and later demolition.

Autodesk Revit Architecture is used by architects and other building professionals to help reduce risk, obtain insight into how buildings will perform before construction begins, develop better quality designs, and improve project delivery. For example, a school of architecture may use Revit Architecture as the software of choice to help its 600 full-time students gain real-world experience using a BIM workflow to build high-impact 3D models. In the case of an engineering and architectural services firm, Revit Architecture may be used to fast-track the complex design and construction of a building that wraps around distillery, processing equipment and allow for a high level of future maintenance and improvements. Ultimately, Revit Architecture is used to create accurate building designs while minimizing the time it takes to coordinate and design in a virtual environment. This, in turn, allows ideas to be worked through faster and helps to maintain better consistency across Projects.

SYLLABUS

1. ADVANCED TOOLS IN SURVEYING -10 HRS

Measuring distances, introduction of conventional and advanced equipment. GPS working mechanism, case study of GPS in Mysuru city, ward maps and control points, total population distribution, errors and future of GPS, application of GPS.

Outcome of the Session:

Working Knowledge on Advances Surveying Equipments, GIS and GPS or engineering experience is highly recommended for Civil Engineering field.

Mr. NAVEEN KUMAR S.M.

2. Practical Session on Advanced Tools in Surveying applications in Civil Engineering- 10 hrs

- Introduction to Total Station, coordinate system.
- Land survey using total station & GPS.
- Block Levelling using Total Station.
- Area Mapping.

Outcome of the Session:

Students become familiar in the Total Station and its application.

Mr. KAVAN M.R.

3. E Surveying software and its Applications -10 hrs

- Live sessions on importing the excel data from the instrument to the E-Surveying Software.
- Drawing of contour lines, importance of radius line and understanding of the contour lines drawn in the software.
- Demonstration on plotting of cross section, longitudinal section, key plan for various projects such as canal alignment, highway alignment, new tank project etc.
- Calculation of earthwork and fixing up of gradients and curves of the highway alignment.

Outcome of the Session:

Students learnt to use of the E-Surveying software tool to plot various drawings related to field surveying.
